

Multi Function Control Package

Bulletin 894

PRINCIPLES OF DESIGN

At the request of a prominent pharmaceutical manufacturer and the consultant of record we were asked to furnish a multi function control package for the decontamination of special spaces.

This product included modulation control, 100% closeoff as well as a very low flow scavage loop.

These components provided compact and cost efficient control. Localized components minimized field programming.

BENEFITS INCLUDE

- Local Control
- Cost Efficient
- Proven Components
- Minimal Maintenance
